## Feed the Future Is Incorporating Climate Smart Agriculture and We'd Like Your Input

*This request for comment comes from Rob Bertram, Chief Scientist at the USAID Bureau for Food Security, which leads the U.S. government's global hunger and food security initiative, [Feed the Future](#).*

Feed the Future is in the process of enhancing its current [cross-cutting theme of climate change](#) in global food security by incorporating Climate Smart Agriculture and would like your input!

The U.S. Agency for International Development, with feedback from across the U.S. Government, has developed a draft paper on Climate Smart Agriculture in Feed the Future and is seeking public comment on it.

To access the draft paper and guiding questions for comments, [please visit Agrilinks.org](#).

Please note the deadline for public comments is noon EDT on August 14, 2015.
